## Dick Morris

*Travels from:* New York/Florida

*Fee Range:* \$10,001 - \$15,000

The most prominent American political consultant, Dick Morris has become well known for his probing, insightful, hard-hitting and clear commentary on the FoxNews channel. With his wife, Eileen McGann, Dick has written fifteen books, including eleven *New York Times* best-sellers. Their almost daily columns circulate by e-mail to 500,000 people and hundreds of thousands more read them online. He now produces a daily web video, seen by over 140,000 separate people each week with a history lesson every Saturday.

Domestically, Morris has handled the winning campaigns of more than thirty Senators and Governors. Internationally, he has piloted the successful campaigns of the president or prime minister of Mexico, Colombia, Argentina, Uruguay, Kenya, Spain, Hungary, Poland, Taiwan, and Japan.

Morris first came to national attention when he provided the strategy that engineered Bill Clinton's stunning comeback re-election victory in 1996, rescuing his presidency after he had lost control of Congress in 1994. Called "the most influential private citizen in America" by *Time Magazine*, Morris steered Clinton back toward the center and was a key player in the Clinton Administration initiatives that balanced the budget, cut taxes and reformed welfare.

The Morris-Clinton relationship began in 1977 when he handled Bill's first campaign for governor. After Clinton was elected, he fired Morris and lost his bid for re-election in 1980. After bringing Morris back, Clinton asked him to guide his successful re-election campaigns in 1984, 1986, and 1990.

In the same vein as their previous crusading works, Morris' and McGann's latest book *Screwed! How Foreign Countries Are Ripping America Off and Plundering Our Economy-and How Our Leaders Help Them Do It* lays bare the unvarnished facts as never before and suggests real, immediate and specific steps to stop those who undermine our interests and take away our jobs.

Dick and Eileen have also published a children's book for kids from ages four to eight entitled *Dubs Goes to Washington and Discovers the Greatness of America* about their golden retriever, Dubs. As he tours Washington in search of his lost tennis ball, he learns about patriotism, values and his country. Their more serious books have been prescient. In *Outrage*, they predicted the collapse of Fannie Mae. In *Fleeced*, they foresaw the stock market crash of 2008. In *Catastrophe*, they warned that Obama's stimulus package would not work. In *2010: Take Back America*, they predicted a 60-80 seat gain in the House. In *Revolt! – How to Defeat Obama and Repeal His Socialist Agenda*, they explain how to use this new power to defeat Obama.

Their other best sellers include: *Off With Their Heads* about the war on terror and *Rewriting History* and *Because He Could*, biographies of Hillary and Bill Clinton. Morris' first best seller was *Behind the Oval Office* - his memoir about the Clinton years. His other books are: *Power Plays*, *Vote.com*, *The New Prince* and *Bum Rap on American Cities* which he wrote in the 70s.
