## Jim Carroll

*Travels from:* **Canada**

*Fee Range:* **\$15,001 - \$20,000**

Jim Carroll is an author, columnist, media commentator, and consultant, with a focus on linking future trends to opportunities for innovation and creativity. He has a 25 year track record in providing direct, independent guidance to a huge, diverse global client base, combined with a previous professional financial background, including 12 years with the world's largest professional services firm. Jim provides high energy keynotes for audiences of 5,000, or intimate, detailed customized strategic planning sessions for CEO / board / senior management meetings. He has researched key innovation success factors for dozens of associations, professions, companies, individuals, and industries including life sciences, health care, insurance, automotive, manufacturing, agriculture, technology, education, government, consumer products, retail, banking and countless others.

He is recognized worldwide as a "thought leader" and authority on: global trends; rapid business model change; business model disruption in a period of economic uncertainty; and the necessity for fast paced innovation. He is an authority recognized for his deep insight into the cutting edge trends of our time, including autonomous vehicle technology and self-driving cars, sensors and the Internet of Things, 3D printing, virtual reality, alternative energy generation and storage technologies, genomic medicine and healthcare virtualization, advanced robotics and artificial intelligence, blockchain and virtual cash, machine learning and robotics, crowd-thinking and next generation R&D.

Jim has a track record of inspiring organizations to reframe the opportunity for innovation in the context of significant, transformative change. When the Walt Disney Corporation needed to inspire senior staff on the topics of innovation and creativity, they brought in Jim. The PGA (Professional Golf Association of America) selected Jim to open their Annual General Meeting for his message on future trends and innovation, the first time in their history that they have ever featured an external speaker for their AGM. They then invited him back again to open their annual PGA Merchandise Show, one of the largest trade events in the world. The Swiss Innovation Forum featured Jim as their closing keynote speaker, delivering a message of the hope and opportunity that can come from being relentlessly focused on innovation. Even NASA has had Jim in (twice) to address groups that included several astronauts, directors of launch operations, flight engineers and program managers, on the concept of "transformational leadership" and the "new business of space."

Essentially, Jim assists organizations in dealing with the future, trends and innovation through three distinct types of events: as the opening or closing keynote speaker for the annual meetings/conferences of national or international associations; keynotes or workshops for private corporate leadership events, ranging from small groups of 15 to several hundred executives, often sponsored by the CEO; or keynotes or panel discussions at customer oriented meetings or promotional events.

Jim's client list is a veritable who's who of global leaders - including the PGA of America; the Wall Street Journal; DuPont; Honeywell; NASA; The GAP; Lockheed Martin; the Accenture Worldwide Energy & Utilities
