In 2003 the Discovery Channel put John to the ultimate test. During the final episode of "More Than Human," the series John hosted, they put John up against the top body language experts and thought reading devices. They wanted to challenge him to see if they could figure out what he was thinking. It was the ultimate test of man vs. machine and one of the most expensive lie detecting experiments ever created for TV.

John continues to baffle the experts and his audiences around the world. Now, you can hire John to try to tap into your audience's mind. No need for state-of-the-art machines. You only need John Pullum. During John's comedy mind reading / mentalist show, you'll be amazed with what John is able to do. Will he read your mind? Will he read the CEO's mind? How about your spouse's mind? Wouldn't you like to know what they are really thinking? Nothing is revealed that is too personal or embarrassing. John's shows and motivational speeches involve your audience. Everyone will feel like they were a part of his presentation.
