Based in Georgia, Kivi was born and raised in Johannesburg, South Africa. After relocating to the USA in 1997 with his wife and family, Kivi went on to build a multimillion dollar international wholesale diamond business.

With the aid of award winning footage, Kivi uses the hunting habits and techniques of the African leopard to draw metaphors of personal and corporate leadership, trust and success that will simply leave you spellbound. Now the author of the internationally acclaimed business book *Leopardology™ - The Hunt For Profit In A Tough Global Economy*, Kivi Bernhard has received accolades from top CEO's and bestselling authors. Kivi is proud to share that *Leopardology™*, was in fact incorporated into the MBA program of Kennesaw State University, Coles School Of Business for 2007.

With an unusual synthesis, Kivi is an orthodox Jew, passionate family man, adventurer, accomplished business entrepreneur, author and renowned speaker. CEO and founder of Kivi International LLC, an internationally known wholesale loose diamond distributor, Kivi's business network reads like a current edition of "Who's Who?" Tapping into this asset has allowed him access to the minds and spirit of some of the most accomplished names in the local and global business arena.

Kivi's "other love," the African bush, has become part and parcel of his fiber as a human being and is what inspired the development of *Leopardology™*. He has an amazing ability to synthesize his lifelong passion and study of Africa's predators with timeless life lessons across the spectrum of human experience. Often described as an amalgamation of "Crocodile Dundee" and "Jerry McGuire with a yarmulke," Kivi is a riveting and captivating orator.

Equally at home tracking lion deep in the African bush as he is in the executive suites of a Fortune 500, he will regale you with enthralling stories of both. A consummate professional, Kivi Bernhard is a fountain of positive energy and human potential. His personal journey, including his victories and his losses, have given him a unique laboratory in which to study the DNA of this thing we call "success."
